

Product data sheet

811-UK

EAN-No. 4000896259328

Length: 110 mm · $\frac{6.3}{16}$ "

- Locking ball
- Non-slip HAZET 3-component handle – allows high power transmission – with hanging hole
- Surface: matt chrome-plated
- DIN 3122, ISO 3315
- Output: $\frac{6.3}{16}$ "
- Dimensions: 110 mm
- For manual operation

New screwdriver family in a standard design

The 803 and 810 screwdriver series has given rise to a new product family: the series 811. It combines all the innovative and practical features of the two previous series **HAZET colour code system and size information on the handle:**

The different drives are categorised according to colour coding. These colours complement the size information on the handle and make it easier to find the required screwdriver quickly **Special design prevents unwanted rolling away Impact cap in the handle:**

The 811S screwdrivers have a robust metal impact cap for tougher applications. It ensures force-fit transmission of hammer blows to the tip of the screwdriver **Laser marking on the blade:**

The length and type of output as well as the article number are laser-marked on the blade, which enables the correct tool to be clearly and permanently identified **A neat and tidy workshop:**

A hanging hole in the handle makes it easy to attach the screwdriver to a hook on the tool panel

Two-coloured handle – three plastics Hard core holds the blade extra-firmly in position so that the maximum torque can be achieved when screwing Soft component ensures very good grip even under difficult working conditions and with lubricating surfaces (oils, greases) Hard component (very robust) gives the perfect shape, stability and a premium feel with every screwing operation

Handle	Non-slip HAZET 3-component handle – allows high power transmission – with hanging hole
